VOLUNTEERING FOR THE CONSERVATION OF ECUADOR’S BIODIVERSITY
www.jatunsacha.org
THE JATUN SACHA FOUNDATION

The Jatun Sacha Foundation is a non-governmental, nonprofit organization dedicated to the conservation of tropical, aquatic and high land ecosystem.

The Foundation was established in 1986 and has since then successfully contributed to the conservation of Ecuador’s pristine and precious ecosystems.

We offer research, courses and volunteering in our 5 reserves in Ecuador.

OUR BIOLOGICAL STATIONS AND RESERVES

JATUN SACHA
- 2’200 hectares of tropical wet forest in the Napo region of the Ecuatorian Amazon
- One of the most diverse areas of the world

CONGAL
- 170 hectares, coastal province of Esmeraldas
- A succession of ecosystems such as beaches, mangroves, man-made wetlands and tropical rainforest

GUANDERÁ
- 1’000 hectares
- Located at 3’200 – 4’000 meters above sea level in the Andes mountains
- Last remaining relics of the once extensive inter-Andean cloud forest and paramo

BILSA
- 5’400 hectares
- Last remnants of the tropical rainforest along the northwestern coast of Ecuador
- Is part of the Chocó Darién - Tumbesino region, one of the 25 hot spots in the world for high biodiversity and high endemism of flora and fauna.
- Belongs to the world most important Bird and Biodiversity Areas (IBAs)

SAN CRISTOBAL (GALAPAGOS)
- 200 hectares on the San Cristobal island
- Dry forest, transitional / Scalesia / Miconia zone
- The Galapagos Islands sit in the Pacific Ocean about 1’000 km west of Ecuador.
- Because the islands were never connected to the mainland, many species of plants and animals are unique to the Galapagos.
